Dear Flint Regional Science Fair,

This trip to Las Angeles California and the entire I.S.E.F experience has greatly affected me in many ways. It has also been a great place to develop new ideas for future innovative projects/ inventions. In fact, this trip did actually inspire me to start researching my new topic because of the success of the Flint finalists.

This trip helped me greatly in many ways. One of them was the class we took while at I.S.E.F on how to present your project. After viewing this program, I realized how much better I could have done when presenting my project. This newly found education will be extremely helpful when I return next year in an attempt to claim first prize! Also the supervisors on this trip, Mr. Aubin and Ms. Vincil, brought a whole new level of enjoyment to this trip by incorporating fun and humor into learning and critically thinking.

As you can see this trip was extremely important to me and I thank you from the bottom of my heart for sending me on this wonderful trip and for helping me become inspired in science, and my future projects! Again thank you so much.

Sincerely,

Bryce Timmons
